

Be the Master of Your Data

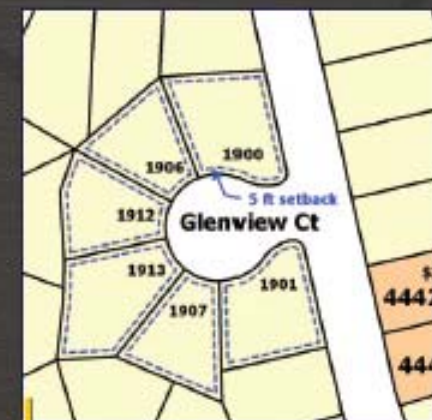

MapViewer makes the most of each and every one of your data points. This powerful thematic mapping and spatial analysis software package allows you to easily produce publication-quality maps, but it doesn't stop there. **MapViewer** also provides the tools to visualize and analyze the geographic distribution of your data so you can make the right decision, every time. Marvel at **MapViewer's** extensive features to produce the most elaborate and visually appealing maps.

Tackle boring reports when you use **MapViewer** to display your data.

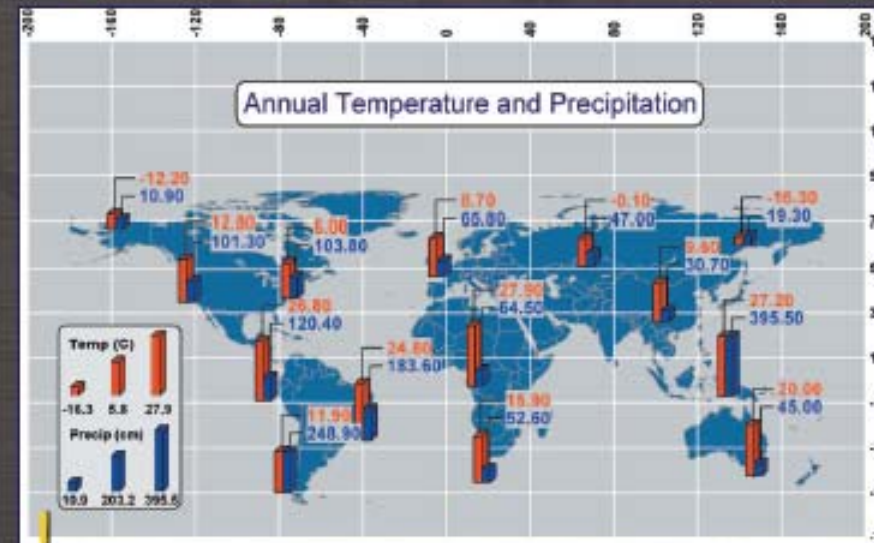

Don't be discouraged by multiple variables. **MapViewer** handles them with ease.

The possibilities are limited only by your imagination. If you can imagine it, **MapViewer** will do it.

MapViewer 7

Enlighten your audience with comprehensive maps. The most complex data sets are no match for **MapViewer's** powerful features.

Exceeding Expectations

"MapViewer meets or exceeds its competition in terms of available cartographic techniques."

Joshua Comenetz, Geospatial Solutions

"I regularly promote MapViewer in workshops because it is so much easier to teach and use than most other mapping software that is available."

Martha Sharma, National Cathedral School

"Yet another demonstration of Golden Software's singular ability to produce user-friendly, efficient and effective spatial/map presentation software."

John Cooper, Armindo Tama Perkasa, Abadi PT

"It is a wonderful, user-friendly product."

Baojin Zhao (PhD.) Professor of Geology, Univ. of Fort Hare, S Africa
