

Amp Up Your Geoprocessing Toolbox

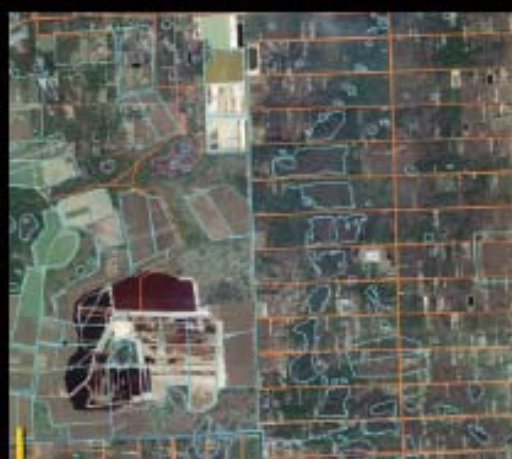

Didger will enhance any software arsenal. Dynamically digitize any map, graph, aerial photo, site map, or printed image regardless of size. **Didger** will easily import and calibrate this well log and digitize the log information before exporting to any file format you choose.

Exceeding Expectations

*"I found **Didger 4** provides other functions that allow me to accomplish some tasks easier...I am enjoying using it."*

Sonja Mathisen

Impress your peers. **Didger** will transform you into a digitizing, georeferencing, reprojection, tiling, and mosaicking master in no time.

Don't Wait!

Didger 4

Don't let digitizing slow you down. There has never been a more comprehensive, powerful, all-in-one software solution with robust digitizing, georeferencing, reprojection, tiling, and mosaicking features. Get rid of those dusty paper maps, graphs, and photographs and use **Didger** to precisely convert those ancient artifacts into a dynamic and modern digital format. **Didger** creates new maps from the ground up or edits any imported map, drawing, image, or data set for quick map or data overlays, data viewing, and projection conversions.

Didger 4

Stay in Control

Tablet, GPS, automatic or manual digitizing options are yours for the choosing.

Save Money

Didger gives you free USGS topo maps & aerial photos.

Don't Settle

An infinite number of projection & datum transformations are at your fingertips.

Work Easy

Download TerraServer imagery, digital raster graphics (DRG) & orthophotos directly from **Didger**.
